Yeah timing is not great. Reality check-I will be reassessing available resources with TechLaw to see what we have available for our sampling activities this Fall. TL, as a sub to Weston, has resources tied up in the GK incident. I will be working on this this week.

**Importance:** High

Hey Dan, sheesh, poor timing on this, but before she left Nicole had a TDF for XRF/soil confirmation on standby with ESAT to be triggered when the removal at the site was complete in mid-August. It is for XRF and 12-18 confirmation samples.

The OSC involved at the site (Pete Stevenson) asked if ESAT can come out this Wed-Thurs or next Tues-Thurs.

Thanks much, give me a call if you have questions.
